Performs Non-Destructive Testing (NDT) inspection of ship's hull structure, piping, pressure vessel etc, and reports with repair recommendation prior to ship's availabilities such as SRA, DSRA and RA, initial inspection must be accomplished for preparing job specification, ordering materials, repair work and testing. Performs NDT inspection when requested by CWP/FWP or the other request. Records the result of the NDT inspection and reports to the concerning Code or Shop. Prepares inspection attributes and conducts Process Surveillance Inspection (PSI) on both in house work and contractor work. PSI involves repair works of welding, brazing, heat treatment, propeller, shaft, hull structure, boiler, piping system and other metal fabrication work. Evaluates repair work based on attributes to ensure compliance with U.S. NAVY technical requirements. Reports deficiencies for corrective/preventive actions and evaluates the reply about root cause of deficiency and corrective actions taken. Advises Quality Assurance director, Welding Engineer or NDT Examiner to take further corrective/preventive action for improvement of qualities. Coordinates welder and brazer qualification test for Shop, and ship's force. Evaluates test specimen by NDT and reports result to Welding Engineer for qualification. Performs other related or incidental duties as assigned.

- a. One year of specialized technical or administrative work experience equivalent at 1-5 level in the related work. If applicant does not have such specialized experience, possession of Masters Degree in a related field may qualify him/her at 1-6 level.
- b. Must possess certificate of visual testing inspector (VT) and at least two certificates among dye penetrate testing inspector (PT), magnetic particle testing inspector (MT), ultrasonic testing inspector (UT), radiographic testing inspector (RT), and propeller inspector.
- c. Knowledge of engineering principles, techniques, methods, and precedents gained through technical experience in the materials field.
- d. Knowledge of non-destructive testing (NDT) inspection and its procedure, methods and techniques.
- e. Knowledge of repair methods of ship's system, including hull structure, propeller, shaft, boiler, machinery and piping system, and items/materials used by ship repair work.
- f. Ability to evaluate repair work to ensure compliance with U.S. Navy technical requirements and report deficiency for corrective action.
- g. Ability to speak, read and write English at fluent proficiency level (LAD-3).

(Note) Certificates stated in b. above are not required at 1-5 and 1-4 levels.

1-4: a. One year of clerical, technical, or administrative work experience in any field. If applicant does not have such work experience, completion of 4-years college/university in any field may qualify him/her at 1-4 level.

*A handicapped applicant may be accepted, depending upon the degree and kind of disability.
